

GOOD

BAD

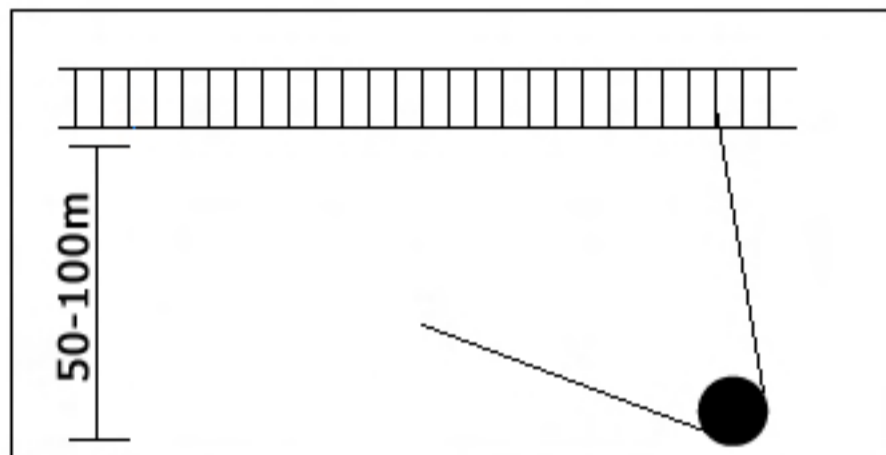

Filming position

90° is good and 50 m from the rails

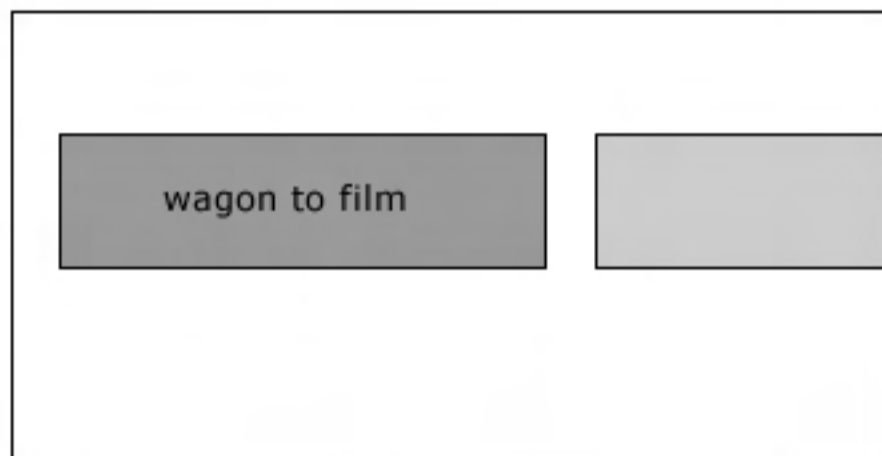

20° is very bad. the wagon seems really small.

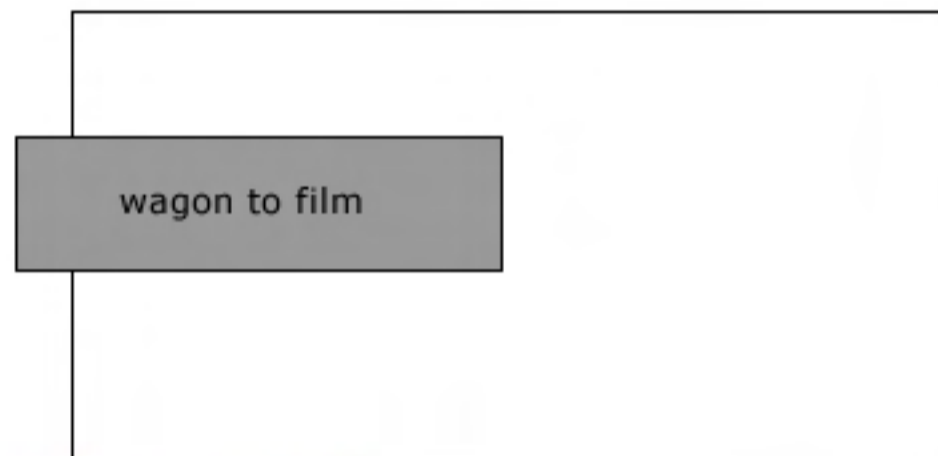

50-80° is also nice, train is coming closer

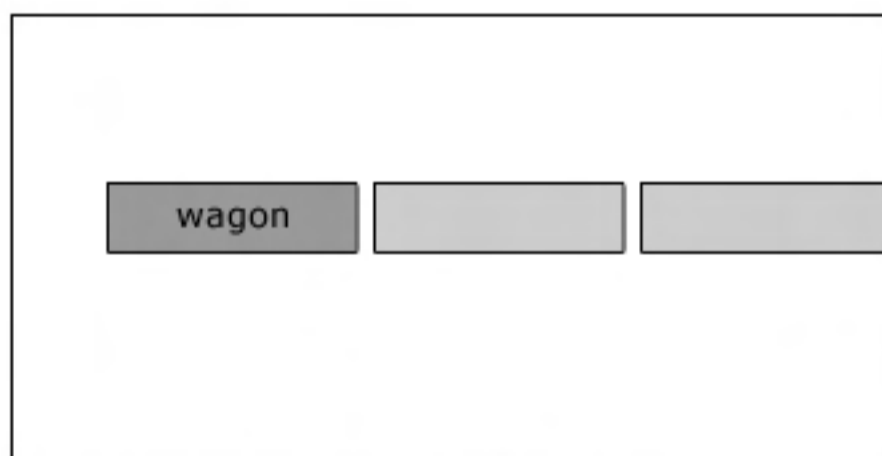

Train position and size

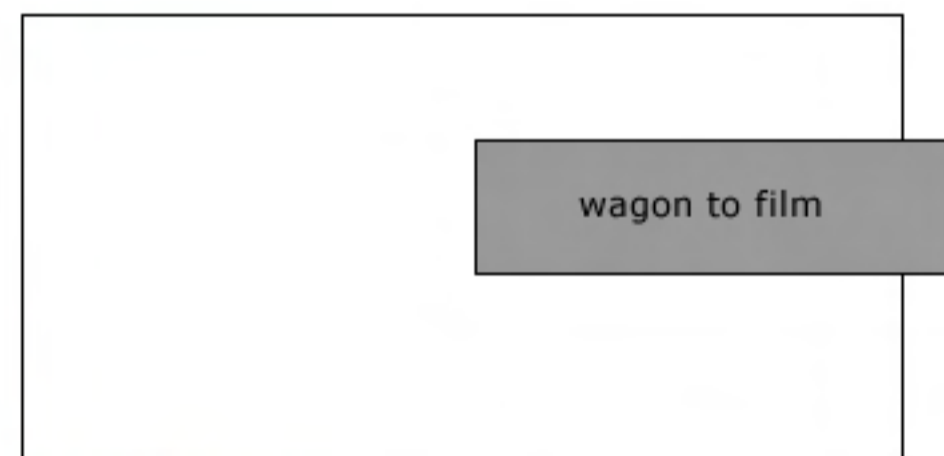

best wagon size

left side cut off

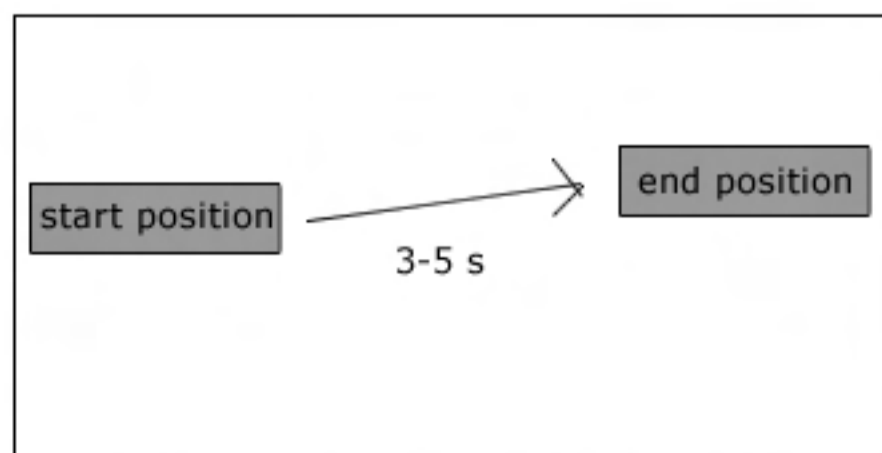

size in the video should not be smaller than this

right side cut off

Video Time

the wagon should be complete visible and move for 3-5 seconds
